If in the process of validation there is shortage in the documents submitted or necessity of presenting additional documents, the controller sends a request to the beneficiary to present the necessary documents within a period of 5 days. The requests for additional information and the relevant answers should be submitted via the Beneficiary portal.

The work of the controller is completed with the submission of Certificate for Validation of Expenditures (CVE) to the project partner (via BP), accompanied by completed Invoice Report (FLC section), with attached Financial report and the List of contracts (Annex 5 to PIM), issued by the project partner.

IX Contract modifications

Only the Lead Partner may initiate a change in the Subsidy contract by sending respective request for modification to the Managing Authority or notification to the Joint Secretariat.

In case of modifications of the approved project which will not affect the project's objectives and outputs and will not jeopardize the successful completion of the project, as well as for administrative changes, the Lead partner should prepare a **Notification letter** in free form, explaining the proposed modification and justification. The letter is to be sent via the BP as attached file to the respective subversion created by the procedure described below.

All other requests for changes require submission of Request for contract modification and its attachments as required in the Programme Implementation Manual to the MA, again via the BP.

3. Submission of Request for modification to the MA

Step by Step guide:

1. Check out if the modification request is filled by pressing View button in section “Modification description” of the respective version:

I. Type of contract modification	
Modification concerning partnership, Extension of project implementation period	v1.2
II. Description and justification of request for project modification	
Description of modification requested	The Subsidy Contract determines the rights and obligations of the Lead Partner and the Managing Authority. The approved Application Form and the Partnership Agreement signed between the Project Partners are integral part of the Subsidy Contract. The Subsidy Contract explicitly provides information concerning project implementation period. During the project lifecycle, due to the certain reasons, some modifications/changes might be necessary concerning the project implementation bases and conditions, defined in the Subsidy Contract.
What are the reasons for the modification request?	Only the Lead Partner may initiate a change by sending respective request for modification to the Managing Authority or notification to the Joint Secretariat. The Request for contract modification must be accompanied by the required supporting documents listed below.
How will the contract modification improve the current project status?	The Request for modification of the Subsidy Contract can be submitted to the MA at least 30 days before the addendum is intended to enter into force. This will give the MA the sufficient time for launching the procedures for JMC approval of the Request for modification. Additionally, the LP should strive to submit the any Request for contract modification at least 60 days before expiration of the project implementation period. Otherwise the request may be rejected.
What are the risks and benefits for the project of the proposed modification?	Amendment of partnership by replacing the partner with another partner / taking over of the partner's activities by the other partners within the investment projects, in which the investment object is ownership / lease of the withdrawn partner, is not allowed.

2. Press **Approved draft** at the end of the row with the version in order to lock the application form and the request template from further changes. A new button will appear in the “Actions” section.

3. Press “Submit” button at the end of respective version of the application form.
