Procedure: Local Open Tender Procedure

QUESTIONS & ANSWERS

No.	QUESTIONS in relation to LOT3: Supply of equipment for firefighters	ANSWER
1.	Question regarding overlapping two-piece suite: As the standart BDS EN 15614 is already under cancellation and the new valid standart is BDS EN ISO 15384:2021 "Protective clothing for firefighters – Laboratory test methods and performance requirements for wildland firefighting clothing", do we have to consider that the protective suits must comply to the standart BDS EN ISO 15384:2021, or equivalent?	In 2021, the standard BDS EN ISO 15384: 2021 came into force, which defines the test method and the minimum technical requirements for protective clothing to be worn when extinguishing a fire in an open area. This standard replaces BDS EN 15614, therefore it is necessary to confirm that the proposed protective suit should be certified according to the requirements of BDS EN ISO 15384: 2021.
